PROFESSIONAL EXPERIENCE

IBM — Contractor

Front-End Cloud Developer | Digital Experience & Web Development | *July 2016 – Present*

- Develop and maintain responsive enterprise web experiences across desktop, mobile, and tablet devices and major browsers, applying UX/UI principles, accessibility practices, and brand standards.
- Support planning, coding, testing, deployment, documentation, and legacy-system modernization using IBM Bob, an AI coding assistant.
- Collaborate with development, UX, communications, and senior leadership teams to translate business requirements into effective web and digital experience solutions.
- Use GitHub and Visual Studio Code for code updates, version control, pull requests, and collaborative development.

- Create and maintain web content, templates, graphics, and digital communications, including recurring HTML newsletters reaching 55,000+ employees and Slack communications supporting enterprise initiatives.
- Apply Adobe Creative Suite, Microsoft 365, and Microsoft Copilot to develop digital content, analyze information, and support workflow improvements.
- Conduct functional and user acceptance testing across software, tools, and features using multiple user personas; troubleshoot issues and recommend usability improvements.
- Support enterprise communications and executive initiatives through research publishing, presentation development, stakeholder collaboration, project planning, and milestone reviews.

Meetings, IT Inc.

Web & Data Management Specialist | *October 2014 – July 2016*

- Specialized in event meeting registration, information technology, and web design for the meetings and events industry, helping clients develop event websites using SaaS and ASP model applications (such as RegWeb, eMeetings Online, Cvent, and StarCite Meeting View).
- Configured, maintained, and supported enterprise event registration platforms, including database structures, user roles, workflows, websites, and reporting requirements.
- Built and maintained automated data processes and integrations that synchronized registration information with core business and automation systems.
- Developed SQL and Microsoft Access queries, reports, and analytics covering registration, attendance, transportation, rooming, seating, breakout assignments, and financial activity.
- Partnered with event planners and management to troubleshoot issues, maintain data accuracy, and translate operational requirements into effective database, website, and reporting solutions.

ISIS Corporation

Database & Application Manager | *September 1995 – July 2014*

- Managed configuration, maintenance, testing, and support of enterprise event registration systems for major national and international meetings.
- Performed large-scale data imports, exports, cleansing, deduplication, validation, and pre-event audits while establishing procedures to maintain database integrity and accuracy.
- Developed SQL queries, scripts, and reporting solutions to audit records, enforce data validation rules, identify discrepancies, and produce operational and executive-level analytics.
- Integrated registration data with airline, hotel, and ground transportation systems and produced detailed reports covering registration, attendance, transportation, rooming, seating, breakout assignments, financial activity, and event logistics for corporate event planners.
- Managed VIP and invitation-only registration lists, badge proofs, and on-site check-in operations; trained temporary staff and maintained confidentiality, data privacy, payment security, and regulatory standards.

EDUCATION

University of Delaware

Bachelor's Degree in Computer Science
